in 5 Threh 1955, the responsible chief technicians of VIB Caselan in last lerlin were asked to set up a plan to reduce technical personnel at the plant by 20 per cent; technical wraftsmen were to be included in those dismissed. The personnel are to be dismissed soon. The order come from the Emnistry of Machine Construction; similar orders were sent to other mast Berlin plants. It is expected that in the near future fewer development and design commissions will be placed with East Berlin industries, presumably because it is so difficult to maintain secrecy in Last Berlin. There are extremely few technicians in Last Germany, and it is expected that technicians who are now being laid off in Last Berlin will be made available to the rest of Last Germany.
